

## TECHNOLOGY | LOGISTICS | COMMUNITY

The nation's largest independent provider of medical equipment disposition services. Since 2014, reLink Medical has assisted over 3,000 hospitals and healthcare facilities in 35 states with the disposition of obsolete, excess, out-of-service, or used medical equipment. With logistics centers of excellence in Cleveland, Baltimore, Atlanta, and St. Louis, reLink Medical is **the most comprehensive disposition solution in the industry.**

### SUSTAINABILITY CHALLENGES

The unique nature of medical equipment creates challenges for hospitals and healthcare systems wanting to properly dispose of end-of-life assets. The sheer volume and variety of devices requires many different methods to effectively manage these assets in safe, legally compliant and environmentally responsible ways. Functioning equipment that is no longer needed is often committed to landfills because it has no commercial value. Staff faced with many other priorities typically do not have time to address all the compliance and safety factors, let alone optimize for environmental sustainability or donations.

### reLink's SOLUTION

reLink's sustainable model for end-of-life medical equipment significantly reduces negative environmental impacts while saving hospitals money. Health system redeployments, resale, and donations give a second life to devices and accessories, serve as the most eco-friendly solution, and improve global healthcare services. Over 6 million lbs. of medical waste are kept out of landfills every year through reLink's unique process. And if recycling is necessary, reLink's ISO-certified processes follow responsible recycling practices and provide full transparency. In partnership with the reLink Global Health Network, we also support over 100 global nonprofits and healthcare partners across 23 countries. We help these nonprofit groups bring much-needed medical devices to regions that do not have the resources to acquire them on their own.

### PARTNER BENEFITS

With reLink Medical, you have a partner committed to reuse, global sustainability, and landfill avoidance. Our processes are optimized to extend the life of assets which increases access to healthcare. Where necessary, recycling is done in a federal, state and locally compliant manner and certificates of recycling and data are provided to support your organization's sustainability efforts and processes.
